

Late Filing

Dear FCC Commissioners & Staff:

Hello. I learned from slashdot.org that you are considering changing the regulations that currently prohibit telephone carriers from limiting outside ISPs from using their networks. Such an action would inevitably cause small, independent ISPs out of business.

The state of internet access, particularly where I live (in Iowa), is already a small enough field and high enough in cost. Changing the regulations to allow anti-competitive behavior is not going to help matters. It is bad for the consumer and I hope you will protect the ability of Americans to have affordable access to the Internet.

Sincerely,

Rosalind Scanes
